

Room Size Guide for a 6ft Pool Table

This diagram is based on using the 48 inch cues that we supply free with all of our 6ft tables. If however you are using a larger 57 inch cue for example you will need to accommodate for the extra space accordingly. Also note in the detailed diagram Fig.1 you will see that when you are playing pool, the cue will rest on the edge of the top frame allowing you a few inches give and take for the cue action whilst you play.
